WORK HISTORY

Production Operator, 09/2014 to Current **Ultra Petroleum – Pinedale, WY.**

- Responsible for the safe, efficient and effective operation and maintenance of the wells, processes, systems and equipment in the assigned area of responsibility. Eliminate unnecessary production loss and process upset by taking timely corrective action.
- Carried out various operational activities on the wellhead platforms to ensure that gas productions are met as per production target and performed services of operators and contractors on assigned platforms to safely and efficiently achieve established production objectives within company policies and procedures.
- Supervised and was accountable for directing contractors on all assigned platforms/locations. I carried out variety of operational tasks, including monitoring SCADA/Cygnnet, control system, implementing routing checks on platforms as per operator's checklist on daily weekly basis.
- Participated in informal training sessions, demonstrated core behaviors, and provided daily guidance on the job training to new production operators.
- Provided accurate and clear communications to provide information on ongoing production conditions, performance, and maintenance program.
- Understand and have knowledge of the company's emergency response procedures and perform emergency response duties and tasks.
- Control and authorize access with my area of responsibility to inspections and maintenance.
- Undertake in the final inspection at the completion of all work done on my equipment, ensuring that the work had been completed satisfactory to the scope, all tools, materials and debris removed; where applicable, determine that the equipment / system is deemed to be worthy of returning to service.
- Maintenance on units and gathered information for well testing and water cut analyzing.
